Product Images

Short Description

- 3U+2U cabinet, designed for optimal performance in every space
- Mountable Network Cabinet
- Ships preassembled for easy setup at your location
- The cabinet comes with a robust steel frontdoor to prioritize security and long-lasting durability

Description

The Slim Flex Wall Mounting Cabinets are ideal for housing both active and passive components. Designed for simplicity, they enable swift and hassle-free installations. Their contemporary design seamlessly blends into office or home settings. Users are presented with dual installation options: The front side features a versatile 3U rail that can rotate vertically, be set horizontally, or even angled. The rear side has a fixed 2U rail, suitable for passive network components, for instance. The lower housing area has pre-punched mounting holes to accommodate non-rack-mountable equipment like DSL routers. Alternatively, a device mounting plate can be added, which is available separately.
